**Unpacking Instructions**
Immediately upon receiving this product, carefully unpack the carton and check the contents to ensure that all parts are present, and have been received in good condition. Notify the dealer immediately and retain packing material for inspection if any parts appear damaged from shipping or the carton itself shows signs of mishandling. Save the carton and all packing materials. In the event that a fixture must be returned to the factory, it is important that the fixture be returned in the original factory box and packing.

**Your shipment includes:**
- ODIN CL-4 Connect
- 5V DC power adapter
- User manual

**Safety Instructions**
Every person involved with the installation, operation and maintenance of this system has to:
- be qualified
- follow the instructions of this manual

**CAUTION!**
Keep this device away from rain and moisture!
Unplug mains lead before opening the housing!

Before you initial start-up, please make sure that there is no damage caused by transportation. Should there be any, consult your dealer and do not use the system.

To maintain perfect condition and to ensure a safe operation, it is absolutely necessary for the user to follow the safety instructions and warning notes written in this manual.

Please consider that damages caused by manual modifications to the system are not subject to warranty.

This system contains no user-serviceable parts. Refer servicing to qualified technicians only.
**IMPORTANT!**
The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorized modification to the system.

- Always disconnect power from the mains, when system is not used. Only handle the power cord by the plug. Never pull out the plug by tugging the power cord.
- Always operate the unit with the AC ground wire connected to the electrical system ground.
- Avoid flames and do not put close to flammable liquids or gases.
- Avoid ground loops! Always be sure to connect the power amps and the mixing console to the same electrical circuit to ensure the same phase!
- Avoid installing your equipment very near radio or TV sets, mobile phones, etc., as these can cause RF (radio frequency) interference.
- Before changing your grounds around, always turn your amplifiers down.
- Before switching on or off, make sure that the sound system’s amplifiers are off or turned down: this will avoid signal peaks, which are annoying and sometimes dangerous (particularly for speaker enclosures).
- Do not connect this device to a dimmer pack.
- Do not open this device.
- Do not switch the system on and off in short intervals, as this would reduce the system’s life.
- If device is dropped or struck, disconnect mains power supply immediately. Have a qualified engineer inspect for safety before operating.
- If the system has been exposed to drastic temperature fluctuation (e.g. after transportation), do not switch it on immediately. The arising condensation water might damage your system. Leave the system switched off until it has reached room temperature.
- Make sure that the available voltage is not higher than stated on the rear panel.
- Make sure that the power cord is never crimped or damaged. Check the device and the power cord from time to time.
- Make sure that there is sufficient room on all sides of the system for air circulation.
- Make sure you do not use the wrong kind of cables or defective cables.
- Never let the power cord come into contact with other cables! Handle the power cord and all connections with the mains with particular caution!
- Never remove warning or informative labels from the unit.
- Never use anything to cover the ground contact.
- Only use device indoors, avoid contact with water or other liquids.
- Please turn off the power, when changing the power cord or signal cable, or select the input mode switch.
- Prevent distortion! Make sure that all components connected to the ODIN have sufficient power ratings. Otherwise distortion will be generated because the components are operated at their limits.
- Repairs, servicing and electric connection must be carried out by a qualified technician.
- Sometimes, when you want to send one signal to more than one amplifier, you should use a signal distributor.
- When connecting the other parts of your sound system, watch out for the so-called “ground loops”.
- WARRANTY: Till one year after date of purchase.
**ODIN CL-4 Connect**

**Connection with the mains**

Connect the device to the mains with the power-plug. Always pay attention, that the right color cable is connected to the right place.

Make sure that the device is always connected properly to the earth!

Improper installation can cause serious damage to people and property!

⚠️ **Return Procedure** ⚠️

Returned merchandise must be sent prepaid and in the original packing, call tags will not be issued. Package must be clearly labeled with a Return Authorization Number (RMA number). Products returned without an RMA number will be refused. Highlite will not accept the returned goods or any responsibility. Call Highlite 0031-455667723 or mail aftersales@highlite.nl and request an RMA prior to shipping the fixture. Be prepared to provide the model number, serial number and a brief description of the cause for the return. Be sure to properly pack fixture, any shipping damage resulting from inadequate packaging is the customer's responsibility. Highlite reserves the right to use its own discretion to repair or replace product(s). As a suggestion, proper UPS packing or double-boxing is always a safe method to use.

**Note:** If you are given an RMA number, please include the following information on a piece of paper inside the box:

01) Your name
02) Your address
03) Your phone number
04) A brief description of the symptoms

**Claims**

The client has the obligation to check the delivered goods immediately upon delivery for any shortcomings and/or visible defects, or perform this check after our announcement that the goods are at their disposal. Damage incurred in shipping is the responsibility of the shipper; therefore the damage must be reported to the carrier upon receipt of merchandise. It is the customer's responsibility to notify and submit claims with the shipper in the event that a fixture is damaged due to shipping. Transportation damage has to be reported to us within one day after receipt of the delivery. Any return shipment has to be made post-paid at all times. Return shipments must be accompanied with a letter defining the reason for return shipment. Non-prepaid return shipments will be refused, unless otherwise agreed in writing. Complaints against us must be made known in writing or by fax within 10 working days after receipt of the invoice. After this period complaints will not be handled anymore. Complaints will only then be considered if the client has so far complied with all parts of the agreement, regardless of the agreement of which the obligation is resulting.
ODIN CL-4 Connect

Description of the device

**Features**
The ODIN CL-4 Connect makes personal DSP settings accessible for the demanding users. You can use it to build a local network, including Wi-Fi connection for communication between your PC and the ODIN Line Array System. There are 4 RJ45 ODIN data output ports for connecting up to 12 ODIN components per each output.

- Power supply: 5V DC, 1000 mA
- Power consumption: 5W
- Carrier frequency: 2,4 GHz
- Data connector: 1 x RJ 45 network data IN / 4 x RJ 45 ODIN data OUT connectors
- Housing: Metal & flame-retardant plastic
- Color: Black
- Dimensions: 195 x 132 x 190 mm (LxWxH)
- Weight: 0,9 kg

**Optional accessories:**
D3900 – ODIN T-8A Line Array Satellite
D3901 – ODIN S-18A Line Array Sub

**Overview**

![Fig. 01](image-url)
Frontside

Antenna
LED indicators (1-4)
The LEDs will blink when uninterrupted data transfer takes place.
LED LAN indicator
Once a network has been established, the LED will light up.
LED power indicator
When the device is connected to the appropriate power supply, the LED will light up.
**ODIN CL-4 Connect**

**Backside**

![Diagram of ODIN CL-4 Connect Backside](image)

- **5** 5V DC power connector IN
- **6** RJ 45 RC NET connectors (1-4)
  - Connect your ODIN Line Array System.
- **7** RJ 45 LAN connector IN
  - Connect to a router, in order to establish a network.

*Fig. 03*
Installation

Remove all packing materials from the ODIN CL-4 Connect. Check if all foam and plastic padding is removed. Connect all cables.

Do not supply power before the whole system is set up and connected properly.
Always disconnect from electric mains power supply before cleaning or servicing.
Damages caused by non-observance are not subject to warranty.

Connection Example

Make your initial connections with all the equipment powered off and ensure that all the main volume controls are tuned completely to the minimum. Follow the steps below. See fig. 04 for more information.

01) Connect one end of the XLR cable to your audio mixer (to MAIN OUT MONO) and the other end of the cable to the audio signal input on your first speaker.
02) Using an XLR cable, connect the audio signal link on your first speaker to the audio signal input on your second speaker. Repeat this step to connect multiple speakers.
03) Using a PowerCON power cord, connect the first speaker’s power input to the power supply.
04) Using PowerCON power cords, connect the first active speaker’s power link to the second speaker’s power input. Repeat this step to connect the third and fourth speaker. **Please note that it is allowed to connect only up to 4 ODIN speakers per phase (16A).**
05) In order to enable data signal reception, connect the CL-4 Connect to the first speaker’s RJ 45 data input, using a UTP/CAT-5 cable. Connect the first speaker’s data link to the second speaker’s data input. Repeat this step to connect multiple speakers. **Please note that to ensure proper data reception it is allowed to connect a maximum of 12 ODIN speakers.**
06) Use the PFL function to get the proper input level for the mixer and adjust the main mix level.
07) After using your equipment, turn off your active speaker cabinets first, then the mixer.

---

**Fig. 04**
Set Up and Operation

Follow the directions below, as they pertain to your preferred operation mode. Before plugging the unit in, always make sure that the power supply matches the product specification voltage. Do not attempt to operate a 115V specification product on 230V power, or vice versa.

Connecting the ODIN Wireless Access Point and Updating

You can connect your PC to the CL-4 Connect via the wireless access point, by connecting it to the router. Follow the steps below.

01) On the list of the available Wi-Fi networks, there will appear a new network named “ODIN.”
02) Establish a connection with this network by inserting the password: **T-8A1OdinS-18A**.
03) Open the Odin Editor software and click on the CONNECT button.
04) Click on the SCANF button. The system will automatically search for the device’s IP and MAC addresses.

05) If it is not possible to automatically find the IP address, insert the IP address manually into the box below and click on the OK button to confirm.
**ODIN CL-4 Connect**

**Note:** In order to determine the current IP address, insert the CL-4’s URL (**10.10.100.254**) into the address bar of your internet browser and press the ENTER button. Login: **admin**, password: **admin**.

There will appear the page shown below. Click on “AP Interface Setting” on the left-hand side of the page. The IP address can be found at the bottom.

---

**06)** Once the connection has been established, go to the Odin Editor. The connection indicator should now light in green: 

**07)** Click on the CL-4 UPDATE button to open the window below:

---

**08)** It is now possible to update the software.

**Note:** In general, you should use the “Normal Program” option to update. While updating, the LEDs on the CL-4’s front panel should be alight. If these LEDs continue to blink, it means that the process has not been completed successfully. In this case, select the “Bad Rom Program” option to retry/repair.
**Connection Cables**

Take care of your cables, always holding them by the connectors and avoiding knots and twists when coiling them: This gives the advantage of increasing their life and reliability. Periodically check your cables. A great number of problems (faulty contacts, ground hum, discharges, etc.) are caused entirely by using unsuitable or faulty cables.

For these applications the unit provides CAT-5 connectors to easily interface with most professional audio devices.

**How to Make a Data Cable**

A standard ETHERNET cable can be used to replace the data cable required to transmit data.

*Please follow the instructions below in order to create an extra net cable.*

Take a standard net cable (CAT-5/5E/6) and connect it to the RJ45 connector, as shown in the picture below (fig. 05). The wires should now be colored as follows:

Maintenance

The ODIN CL-4 Connect requires almost no maintenance. However, you should keep the unit clean. Disconnect the mains power supply, and then wipe the cover with a damp cloth. Do not immerse in liquid. Do not use alcohol or solvents. Keep connections clean. Disconnect electric power, and then wipe the connections with a damp cloth. Make sure connections are thoroughly dry before linking equipment or supplying electric power.

Troubleshooting

This troubleshooting guide is meant to help solve simple problems. If a problem occurs, carry out the steps below in sequence until a solution is found. Once the unit operates properly, do not carry out following steps.

01) If the device does not operate properly, unplug the device.
02) Check the power from the wall, all cables, etc.
03) If all of the above appears to be O.K., plug the unit in again.
04) If you are unable to determine the cause of the problem, do not open the device, as this may damage the unit and the warranty will become void.
05) Return the device to your Dap Audio dealer.
